

Dear Residents of Oro Valley,

We are writing to inform you that the streets in your area will soon be treated with Delta Mist, a sustainable, plant-based asphalt rejuvenator.

Delta Mist is being applied to extend the life of our pavement surfaces, reduce long-term maintenance costs, and support environmentally responsible infrastructure management. This treatment helps preserve the integrity of the asphalt by extending the essential oils lost over time, ultimately minimizing cracking and surface wear.

We appreciate your cooperation during this brief maintenance period and are committed to making the process as smooth and efficient as possible. Please look out for signage with specific dates and temporary access adjustments.

Thank you for your continued support in keeping Oro Valley safe, clean, and sustainable.

Sincerely,

Kevin Smith

Maintenance Superintendent
